Response to Amendment

This action is in response to the request for reconsideration filled on 1/24/05.

As per applicant's request claims 1-20 have been considered but they are not persuasive.

Claims 1-20 stand rejected under U.S.C. 102(b) as being unpatentable over *Lee et al* USPN 5,995,969.

In remarks applicant argues,

I) "The generation of a process step on the basis of the definition in the metadata definition storage and to then execute this process step by using the application data by means of the first function specified in the metadata definition storage" and "Automatic generation of a process step" as to claims 1, 6, 11 and 16.

II) "Corresponding runtime environment for accessing the application data on the basis of the data logic and executing the process step using the application data by means of the first function specified in the metadata definition storage" as claims 1, 6, 11 and 16.

Response to applicant's arguments,

I) It was noted by the applicant in his remarks that cited reference provide a meat model system of an integrated CASE repository and integrated supporting method which constructs are repository for storing, sharing and managing information generated by CASE tools of DFD and SC process methodologies to realize a standardization and full "automation" of software development process of information between tools and automatically integrated manages information of analysis and design for structured techniques supporting the software development process (figure 8, see column 2 lines 16-30). Therefore, examiner believes that

Art Unit: 2193

definition of metadata has been stored and also automation has taken place in order to execute the steps. Thus limitations are met by the reference.

II) It was also noted in the reference that CASE repository stored logical data structure which represents integrated CASE meta model and information used by each tool is performed by logical data structure which is to performed in corresponding runtime environment for accessing the application data (figures 1, 3 and 4, column 4, lines 25-34). Therefore, examiner believes that cited reference fairly suggests about runtime environment for accessing the application data on the basis of the data logic and executing the process step using the application data by means of the first function specified in the metadata definition storage. Thus, limitations are met by the reference.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
